Project

PM Poshan Aahar   June 2022 – July 2022
- PM Poshan Aahar is a dynamic web application built to manage school meal programs and track student growth through height and weight measurements. The project features three main panels: Admin, School, and Supplier, each with specific functionalities and permissions.
- Language and tools: Java, Servlet, JSP, HTML, CSS

E-commerce website   May 2024 – June 2024
- Developed a fully functional Ecommerce website with a responsive UI, enabling users to browse, search, and purchase products. Integrated secure payment gateways, inventory management, and user authentication systems. Implemented product categorization, customer reviews, and an intuitive shopping cart experience to enhance user engagement.
- Language and tools: React, Tailwind CSS, HTML

Resume Builder website   jully 2024 – August 2024
- Built a Resume Builder application where users can select a template, input personal details, and generate a professional resume. Integrated dynamic template rendering and data binding for real-time updates. Utilized ReduxTool for efficient state management, ensuring a smooth user experience and streamlined data flow.
- Language and tools: React, Tailwind CSS, HTML

Technologies

Languages: C, Java, JavaScript, HTML, CSS

Framework and Libraries: React, Bootstrap, Tailwind CSS

Platform: VsCode, Git, GitHub
